# Lloyd's Register of Shipping,

71, Fenchurch Street, E.C.3.

15th August, 1939.

Dear Sirs,

E.

I am returning to you under separate cover two copies of the plan, advised in your letter of the 9th instant, of Vertical Cross tube Donkey Boiler proposed to be constructed by Messrs. A/S. Smith, Mygind & Huttemeier, of your port, for the Motorship "CHILE", and have to inform you that this plan will be approved for a working pressure of 8 Kgs. per sq. cm. provided the corner radii of dished crown plates be not less than 64 mm., the welding of the firebox crown plate to firebox be as shown on the plan and all welding be carried out with approved electrodes to your satisfaction, and the boiler be constructed under the usual conditions of survey and testing.

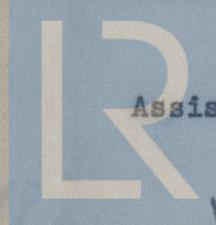

It is concluded that the firebox will be suitably heat treated after being welded and before riveting to the uptake and shell.

I am, Dear Sirs,

Yours faithfully,

Assistant Secretary.

The Surveyors,  
COPENHAGEN.
