Reference

Dear Sir,

With reference to the classing letter of yesterday's date respecting Middlesbrough Report No. 10666 on the steamer "ASTER", I have to inform you the screw shaft is fitted with a continuous liner, and that escape valve springs of each size have been placed on board as spare.

With regard to the spare bucket and rod for lubricating oil pump, two complete pumps were fitted, and as the specification does not call for these items, it was not considered necessary to request the same to be placed on board.

I am, Dear Sir,

Yours faithfully,

The Secretary,

London.
