LLOYDS AGENCY,
ADEN.**RETAIN**
SURVEY ON SHIP.

26 FEB 1921

Dealt by 10930

The undersigned having been called upon by Lloyds Agent on the demand of **J. Norberg,** the Master of the S.S. "Western Knight" I surveyed that vessel on the **2nd.** day of **February,** in consequence of her having put back to this port after stranding off Ras Kaau.

DISCLOSED
SECTION.

No. 119

On examination of this vessel on the day named I found the Master stated he had stranded between Ras Kaau & Paraseval Rock about 3/5ths of a mile East of the latter place, which is 37 miles from this port. Vessel had gone easily ashore on a soft bottom at 11/20 p.m. on January 28th. After discharging about 440 tons cargo (wheat in bags) into S.S. "Vaghilsh" the vessel again floated & was assisted off by S.S. "Meyun" on February 1st at 1 a.m.

I recommended that a diver be sent down to examine hull & he reported that there was no apparent damage to hull, but that a wire rope was round tail end shaft between stern boss & propeller.

I recommended that this be removed & again visited vessel on 3rd. inst. & found from soundings taken on previous day vessel was not making any water.

I hereby recommend that vessel re-load the discharged cargo & proceed on her voyage remaining as classed in the Register Book, subject to docking for examination at first convenient opportunity.
