

Messrs. Burmeister & Wain Ltd.

Proposed use of Thomas Steel for parts of welded bed-plate.  
-----

IT IS SUBMITTED the Copenhagen Surveyors be informed it is noted that the experimental engine having a welded bed-plate embodying transverse members made of Thomas Steel, has now been sold and is intended to be installed in Messrs. Aalborg Vaerft's Yard No. 64, and it is concluded that this vessel is not intended to be classed with this Society, <sup>it is important that</sup> but this conclusion should be confirmed. <sub>h</sub>

It is also noted that the Surveyors have discussed the question of the use of Thomas Steel with Messrs. Burmeister & Wain and that the Firm contemplate sending a member of their Technical Staff to London to discuss the matter.

The Surveyors should inform the Firm that members of the Chief Engineer Surveyor's Staff will be pleased to discuss the subject under notice with representatives of the Firm.
