

s.s. "LLANDILO"

It is submitted the Builders be informed that the proposed arrangements for doubling the fore mast on account of the installing of a 25-ton derrick will be approved, provided the mast be suitably stayed. Care should be taken to ensure that the riveting is not disturbed due to the welding of the doubling.

A sketch showing the arrangement and size of the stays should be submitted along with the plan of stiffening under the derrick heel.
