

are they over compounded 5 per cent. yes., if not compound would state distance between each general

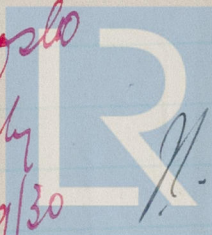

"Danwood."

Oslo. 3505-b  
Elec. Fittings Rpt

It is concluded that the conductors for the main generators, the air compressor motor and the motors of the lubricating oil pumps are in accordance with the Rules ~~to~~ as regards current carrying capacity and insulation. The surveyor should state the actual insulating materials used in all cables.
