Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

27th January, 1938.

Dear Sir,

H. I have to acquaint you in August last the
Newcastle Surveyors recommended that the cone/^{end} of the thrust
shaft of the steamer "THODE FAGELUND" should be examined at
the first opportunity, and in reply to enquiry the Owners state
that they have written to their New York Office asking them to
arrange for this matter to receive attention at that port.

In the circumstances I shall be glad if you will
arrange for the case to be attended to, and I may add for
the Surveyors' information that the hollow coupling should
be removed and, together with the cone end of the thrust
shaft, examined throughout.

I am, Dear Sir,

Yours faithfully,

Clerk to the
Classification Committee.

Wm. Bennett Esq.,
NEW YORK.
