Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

24th February, 1920.

Dear Sir,

S.

With reference to Glasgow First Entry Report No. 39577 on the Steamer "PENTLAND FIRTH", I shall be glad if you will kindly ascertain from the Surveyors and let me know whether the stiffeners on the collision bulkhead are spaced as required; the width of butt straps on the bridge side plating is as required for double riveting, and also whether it is the shell edges at the frames that are joggled.

I should add that the forging certificate advised in the report does not appear to have yet come to hand.

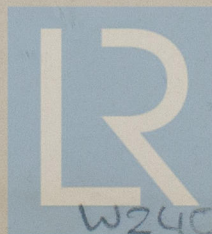

I am, Dear Sir,

Yours faithfully,

Secretary.

The Secretary.

GLASGOW.
