Lloyd's Register of Shipping.

Port Buenos Aires.

26th. April 1940.

This is to Certify that I have

starboard Surveyed the Boiler and Machinery of the steel screw steamer "URUGUAY", of Buenos Aires, 1866 tons net register,

and that I have transmitted to the Committee of Lloyd's Register of Shipping, London, a Report stating that all recommendations made by me in connection therewith have been carried out to my satisfaction, and that I have

Recommended that the record of B.S.4-40

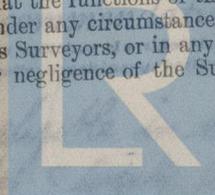

be made in the Register Book in the case of this vessel, when the plain smoke tubes and twenty four combustion chamber screw stays have been renewed and a number of wasted combustion chamber and furnace flange rivet heads have been built up or renewed all in the starboard main boiler, and the safety valves of the centre and starboard main boilers have been adjusted under steam, the above to be effected on arrival at a port in the U.K. or Continent from her present voyage from Buenos Aires.

J.A. Orde

Engineer Surveyor to Lloyd's Register.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—

"While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Committee nor the Society are under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society."
