

Messrs. Wilton-Fyenoord's Yard No. 669.

Petroleum in Bulk.

Electrical Installation.

The plans indicate cartridge type fuses of Messrs. Siemens and Hazemeyer manufacture. These fuses have not yet been generally approved, but it is considered that in view of the small size of the equipment, no exception might be taken in this instance.

IT IS SUBMITTED the Rotterdam Surveyors be informed that provided the installation be as shown and amended on the plans, and to their satisfaction, and the special requirements of Section 15 and the remaining requirements of the Rules for Electrical Equipment be complied with, the plans merit approval.

It should be pointed out that in view of the small size of the equipment, no exception will be taken in this instance to the use of the proposed fuses of Messrs. Siemens and Hazemeyer, indicated on the plans.

Return 1 set of plans.  
Retain 1 set.
