

## REPORT ON MACHINERY.

No. 70543

Received at London Office SAT DEC 22 1917

Date of writing Report 10th Dec 1917 when handed in at Local Office 13th Dec 1917 Port of NEWCASTLE ON TYNE

No. in Survey held at Jarrow Reg. Book. Date, First Survey 3rd July 1915 Last Survey 12th Dec 1917 Number of Plates 126

43 on the D. Cadillac Master Built at Hebburn By whom built Palmers Ltd

Engines made at Jarrow By whom made Palmers Ltd when made 1917

Boilers made at do By whom made do when made 1917

Registered Horse Power Owners Anglo American Oil Co Ltd Port belonging to British

Nom. Horse Power as per Section 28 793 Is Refrigerating Machinery fitted for cargo purposes No Is Electric Light fitted Yes

**ENGINES, &c.** — Description of Engines Underwater Cylinders four No. of Cylinders four No. of Cranks 4 Dia. of Cylinders 28 $\frac{1}{2}$ , 41, 58 & 84 Length of Stroke 54 Revs. per minute 72 Dia. of Screw shaft as per rule 16-98 Material of Iron Is the screw shaft fitted with a continuous liner the whole length of the stern tube Yes Is the after end of the liner made water tight in the propeller boss Yes If the liner is in more than one length are the joints burned ✓ If the liner does not fit tightly at the part between the bearings in the stern tube, is the space charged with a plastic material insoluble in water and non-corrosive ✓ If two liners are fitted, is the shaft lapped or protected between the liners ✓ Length of stern bush 5-9"

Dia. of Tunnel shaft as per rule 15-26 Dia. of Crank shaft journals as per rule 16-028 Dia. of Crank pin 16 $\frac{1}{4}$  Dia. of Crank webs 22 $\frac{3}{4}$  Dia. of thrust shaft under collars 16 $\frac{1}{4}$  Dia. of screw 20-6 Pitch of Screw 18-9 No. of Blades 4 State whether moveable No Total surface 120 if

No. of Feed pumps one pair Pairs Diameter of ditto 32 Stroke 27 Can one be overhauled while the other is at work Yes

No. of Bilge pumps 2 Diameter of ditto 5 Stroke 27 Can one be overhauled while the other is at work Yes

No. of Donkey Engines 1/2 Sizes of Pumps 5x10x12 5x6x10 No. and size of Suctions connected to both Bilge and Donkey pumps

In Engine Room five 3 $\frac{1}{2}$ " diameter In Hold on top of deep tank one 2" p.5 and one 2 $\frac{1}{2}$ " p.5 hand pump.

No. of Bilge Injections one size 12" Connected to condenser, or to circulating pump Pump Is a separate Donkey Suction fitted in Engine room & size Yes 6"

Are all the bilge suction pipes fitted with roses Yes Are the roses in Engine room always accessible Yes Are the siphons on Engine room bulkheads always accessible

Are all connections with the sea direct on the skin of the ship Yes Are they Valves or Cocks Both

Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates No Are the Discharge Pipes above or below the deep water line above

Are they each fitted with a Discharge Valve always accessible on the plating of the vessel Yes Are the Blow Off Cocks fitted with a spigot and brass covering plate Yes

What pipes are carried through the bunkers None How are they protected ✓

Are all Pipes, Cocks, Valves, and Pumps in connection with the machinery and all boiler mountings accessible at all times Yes

Are the Bilge Suction Pipes, Cocks, and Valves arranged so as to prevent any communication between the sea and the bilges Yes

Dates of examination of completion of fitting of Sea Connections 30/2/17 of Stern Tube 30/2/17 Screw shaft and Propeller 30/2/17

Is the Screw Shaft Tunnel watertight None Is it fitted with a watertight door ✓ Worked from ✓

**OILERS, &c.** — (Letter for record S) Manufacturers of Steel John Spencer & Sons Ltd

Total Heating Surface of Boilers 11392 ft² Is Forced Draft fitted No. and Description of Boilers Four Single Ended

Working Pressure 220 lbs per sq in Tested by hydraulic pressure to 440 lbs Date of test 25/5/16 No. of Certificate 5891

Can each boiler be worked separately Yes Area of fire grate in each boiler 74 ft² No. and Description of Safety Valves to each boiler 1/2" direct spring Area of each valve 8-29 ft² Pressure to which they are adjusted 225 lbs Are they fitted with easing gear Yes

Smallest distance between boilers on uptakes and bunkers or woodwork 24" outside Mean area of boilers 16-3" Length 12-0 Material of shell plates Steel

Thickness 1 $\frac{1}{2}$ " Range of tensile strength 29 $\frac{1}{2}$ -33 ton Are the shell plates welded or flanged No Descrip. of riveting: cir. seams & R Lap long. seams Double straps 5 rivets Diameter of rivet holes in long. seams 1 $\frac{1}{2}$ " Pitch of rivets 10" Top of plates or width of butt straps 21 $\frac{3}{4}$ "

Percentages of strength of longitudinal joint plate 85-0 Working pressure of shell by rules 220 lbs Size of manhole in shell 16x12"

Size of compensating ring McNeil's No. and Description of Furnaces in each boiler 4 Hoppers Material Steel Outside diameter 43 $\frac{3}{8}$ "

Length of plain part top Thickness of plates crown 1 $\frac{1}{2}$ " Description of longitudinal joint Welded No. of strengthening rings ✓

Working pressure of furnace by the rules 230 Combustion chamber plates Material Steel Thickness: Sides 2 $\frac{1}{2}$ " Back 4/16" Top 2 $\frac{1}{2}$ " Bottom 1"

Pitch of stays to ditto: Sides 8 $\frac{1}{2}$ x7 $\frac{1}{2}$  Back 9x5" Top 8 $\frac{1}{2}$ x7 $\frac{1}{2}$  If stays are fitted with nuts or riveted heads Nuts Working pressure by rules 222

Material of stays Mild Steel Diameter at smallest part 2-0 3" Area supported by each stay 73" Working pressure by rules 250 End plates in steam space

Material Mild Steel Thickness 1 $\frac{1}{2}$ " Pitch of stays 7/2x15 $\frac{3}{4}$ " How are stays secured by nuts Working pressure by rules 225 Material of stays Steel

Area at smallest part 1" Area supported by each stay 276" Working pressure by rules 230 Material of Front plates at bottom Steel

Thickness 1 $\frac{1}{2}$ " Material of Lower back plate Steel Thickness 1" Greatest pitch of stays 14 $\frac{1}{4}$ " Working pressure of plate by rules 256

Diameter of tubes 2 $\frac{1}{2}$ " Pitch of tubes 3 $\frac{3}{4}$ " Material of tube plates Steel Thickness: Front 1/32" Back 25/32" Mean pitch of stays 9 $\frac{1}{8}$ "

Pitch across wide water spaces 1 $\frac{1}{2}$ " Working pressures by rules 222 lbs Girders to Chamber tops: Material Steel Depth and thickness of girder at centre 9 $\frac{1}{2}$ " 1 $\frac{3}{4}$ " Length as per rule 34" Distance apart 8 $\frac{1}{2}$ " Number and pitch of stays in each three, 7 $\frac{1}{2}$ "

Working pressure by rules 120 lbs Superheater or Steam chest; how connected to boiler None Can the superheater be shut off and the boiler worked separately

Diameter Length Thickness of shell plates Material Description of longitudinal joint Diam. of rivet

Pitch of rivets Working pressure of shell by rules Diameter of flue Material of flue plates Thickness

Stiffened with rings Distance between rings Working pressure by rules End plates: Thickness How stayed

Working pressure of end plates Area of safety valves to superheater Are they fitted with easing gear

W370 - 0027

IS A DONKEY BOILER FITTED? No

If so, is a report now forwarded?

SPARE GEAR. State the articles supplied:

no top & 2 bottom end bolts & nuts, 2 main bearing bolts & nuts, one set of coupling bolts & nuts, one set of feed & bilge pump valves, assorted bolts & nuts, a few bars of iron, one propeller shaft, one set of bottom end bushes, one eccentric strap to centrifugal pump zone shaft, four propeller blades etc.

The foregoing is a correct description;

Palmer's Shipbuilding & Iron Co., Ltd.,

D. Kemp.

Manufacturer.

Manager, Engine Dept.

Completion of pumping arrangements 27/11/17 Boilers fixed 6/11/17 Engines tried under steam 27/11/17

Main boiler safety valves adjusted 27/11/17 Thickness of adjusting washers 1/16-1/32-1/32-1/8 1966D

Material of Crank shaft Steel Identification Mark on Do. 29/6/17 Material of Thrust shaft Steel Identification Mark on Do. 29/6/17 GM.

Material of Tunnel shafts None Identification Marks on Do. Material of Screw shafts Steel Identification Marks on Do. 29/6/17 GM.

Material of Steam Pipes Steel + Copper Test pressure 100 lbs Copper 1440 lbs per sq in

Is an installation fitted for burning oil fuel Yes Is the flash point of the oil to be used over 150° F. Yes

Have the requirements of Section 49 of the Rules been complied with? Yes

Is this machinery duplicate of a previous case? No If so, state name of vessel.

General Remarks (State quality of workmanship, opinions as to class, &c.) The machinery of this vessel has

been constructed under special survey, the materials and workmanship are of good quality, it has been securely fitted on board and satisfactorily tested under steam, three of the boilers burning oil & the fourth boiler burning coal. The oil burning fittings have now been removed as it is intended to burn coal on the outward passage.

Although the requirements of the rules have been carried out for burning oil below 150° flash point, the Owners desire that the vessel be classed for burning oil fuel above 150° and the Superintendent (Mr Norton) states that this Society will be given due notice should the Owners at some future time desire to carry oil of a flash point below 150° so that the discharge pipe line to dump tank may be removed.

The machinery of this vessel is now in my opinion eligible for second class L.M.C. 12.17 (osed) for burning oil above 150° F.

Main boilers plan, steel test moniter, fit forging casting report and 2 plans of oil burning arrangements.

This vessel is eligible for

L.M.C. 12.17. FD.

Fitted for oil fuel 12.17. F.P. above 150°

George Murdoch J.W.D.

Engineer Surveyor to Do. & Register of British & Foreign Shipping

27/12/17

The Surveyor is required not to write on or below the space for Committee's Minutes

The amount of Entry Fee £ 3 : 0 : When applied for.

Special £ 59 : 13 : 21 DEC 1917

Donkey Boiler Fee £ 1 : 15 : When received.

Travelling Expenses (if any) £ 1 : 12 : 15 : When received.

FRI 28 DEC 1917
