

Oil Tanker "CHARLES PRATT"

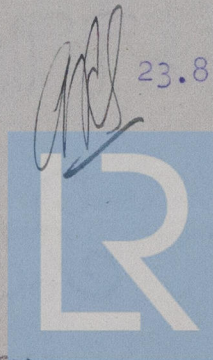

This vessel came under survey at Newport News in May last, and the Surveyor forwarded a preliminary report, No. 4758, of repairs required and additional strengthening proposed to be fitted by the Owners.

Upon receipt of this report Mr. French was requested, in the Secretary's letter of 2nd instant, to obtain from the Surveyor certain information. The Surveyor's report of the completion of the repairs has now come to hand, but no reply has been received to the Secretary's letter referred to.

It is submitted Mr. French be requested to forward a reply as soon as possible.
