

"ATHELKING"

Liv 104668

The Liverpool Surveyors report that the main engines of this vessel (oil engines 2 S.C.S.A.) have now been replaced by new oil engines (4 S.C.S.A.). These engines have been built under Special Survey in accordance with approved plans. The thrust and intermediate shafting have been renewed.

RETAIN

These engines have been satisfactorily fitted on board, all auxiliaries, pumps, compressors, pumping arrangements, receivers examined and tested under working conditions at sea and found in accordance with Rule requirements.

The Surveyors recommend that the new solid bronze propellers fitted now, which set up a slight amount of noise during the trials, be re-examined at the next dry docking.

It is submitted that this vessel is eligible for the records
