

"DUQUESA"

A letter has been received from the Owners requesting that the date of build of this vessel should be recorded as from the time she came out of Dry Dock on the River Tyne. The West Hartlepool Surveyors have been communicated with and they state that the vessel was examined in Dry Dock on the River Tyne on the 16th May, 1918.

The vessel was launched in December, 1916, and according to the Rules is eligible to have a date of build of six months later = June, 1917.

It is submitted for the consideration of the Committee how far, in the present circumstances, the Owners' wishes could be met in the matter..
