

of "Duguesa".

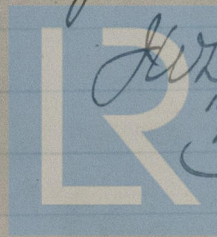

Hpl Rpl 15499.

It is submitted the Hattlepool Surveyors should be informed that the nominal horse power of this vessel's engines is 1076, with a corresponding fee of £71.18.0, and not 899 (which appears to be the horse power for a single screw engine) as given in the report.

And they should be requested to send an amended account of the fees to the Engine manufacturers.

The Surveyors should further be informed that it is concluded a spare set of coupling bolts has been placed on board but as no mention of this is made in the report, they should state whether this is so.
