Lloyd's Register of Shipping.

Port Liverpool.

11th February 1939.

LOADING CERTIFICATE FOR VESSELS HOLDING LLOYD'S REFRIGERATING MACHINERY CERTIFICATE.

This is to Certify that the Survey required by paragraph 11 (as printed on the back hereof) of the Society's Rules as to Refrigerating Machinery and Appliances has been held by me at this port on the Refrigerating Machinery and the Insulation and Appliances of the No 6 port tween Deck Chamber.

of the S.s. "Duquesa",
which has the record LLOYD'S RMC 2.39. in Lloyd's Register Book.

On such Survey, I found the insulation undamaged and clean, the dunnage battens, where these are required, in good order, and the Refrigerating Machinery, when tested under working conditions, also in good and satisfactory order.

I have transmitted to the Committee of Lloyd's Register of Shipping, London, a Report stating that all recommendations made by me have been completed to my satisfaction.

Before loading was commenced, the temperature of the cargo chambers was reduced as follows:—

<u>No 6 port tween Deck</u>	<u>to 19°F.</u>		
	<u>to</u>		<u>to</u>

and in my opinion the vessel is fit to carry refrigerated cargo during the contemplated voyage to San Pedro de Macoris.

[Signature]
Surveyor to Lloyd's Register of Shipping.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—

"While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Committee nor the Society are under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society."
