"IRENE MARIA"

RETAIN

when the Annual Load Line Survey has been held, the WNA timber Load Line amended to agree with the Certificates and the freeboards have been verified. Particulars of the closing appliances fitted to the openings in the end bulkheads of the superstructures should be inserted on the Certificates before issue and this Office advised. I have to say that the issue of British Certificates for ex-Danish ships is dependent on Annual Surveys being held and your assumption is correct.

The Surveyors,
LEITH.
