

"IRENE MARIA".

Ant.21517.

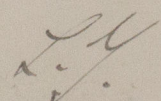

The Boiler Survey due 11,37 has been partly held by the examination of the starboard boiler.

Serious cracking between rivet holes in the combustion chamber plating was found and the Surveyors recommended the starboard boiler be not used again until repaired.

The case has already been dealt with in endorsement dated 15.11.37.

A letter has been received from the Antwerp Surveyors in which it is stated that the vessel is proceeding to Rotterdam.

It is submitted action be deferred and the Rotterdam Surveyors be informed that samples of the material, soda and salts have already been sent to the Glasgow Office for investigation.

25.11.37.
