

M.V. "LAGARTO"

Mr. Lyle telephoned to say that the Pacific Steam Navigation Company were now contemplating the sale of this vessel to Chinese interests, and that for the purpose of framing the sale contract they wish to know the Society's requirements for the voyage out to China as a classed ship.

After discussion it was agreed Mr. Lyle should inform them that it would be necessary for the vessel to be examined in drydock and for hull and machinery to be made efficient for the voyage.

The Donkey Boiler Survey should be held and the shafts drawn if the wear down warranted.
