ON 11.11.35 I was present at the meeting of the
Board of Directors of the company and was informed
that the company had received a letter from the
Chief Ship Surgeon dated 11.11.35 in which he
stated that the ship was not fit to proceed to sea
and that the company should not attempt to do so
until the ship had been repaired. I was informed
that the company had decided to comply with the
Surgeon's advice and that the ship would be
repaired before proceeding to sea.
