FITTING OF SECOND DECK

This is a vessel of the Standard A single deck type.

A letter has been received from the Antwerp Surveyors stating that it is proposed to fit a new second deck.

Plans showing the proposals made by the Antwerp Engineering Company, who are to carry out the alterations, have been forwarded by the Surveyors.

This proposal is very similar to that dealt with for the s.s. "BELGIER" on the 6th instant, except that in the present instance a middle line bulkhead is fitted extending from the after end of No.1 hold to the fore end of No.4 hold.

It is proposed to retain the middle line bulkhead as fitted and to cut and bracket the beams of the new second deck at this bulkhead.

It is submitted that provided the arrangements be carried out as shown and amended on the plans and to the Surveyors satisfaction, the proposals will merit approval.

On completion of the work and on receipt of a satisfactory report from the Surveyors a record will be made in the Register Book as follows :- 2nd deck (Steel) in Nos. 1,2,4 & 5 holds".
