

S.Ss. "CAMILLO", "HERMIONE" & "LOMPOC"

It is submitted the writers be informed that in view of the inspections of the boilers of these laid up vessels recently carried out it is considered that all of the boilers of the "CAMILLO" and "HERMIONE" and the port aft boiler of the "LOMPOC" can be used for harbour purposes.

With regard to the starboard and forward boilers of the "LOMPOC" the Surveyor reported that some of the furnaces of these boilers are distorted and it is understood to be the writers' intention not to use these two boilers until the furnaces have been dealt with.

It should be borne in mind that a complete Boiler Survey will require to be carried out in each case before the vessels are recommissioned.
