Report No. *132* Port *Copenhagen*

Particulars of Examination and Repairs (if any)

Special Surveys, when held, must be reported in detail and serially in the terms of the Rules. State clearly the

of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs on

being detailed in the body of the report, should be separated from Repairs due to other causes; and

and initials of any letters respecting this case.

If the Surveyor has not made a special damage report he is required to state whether he

has made his services for this purpose, and why they were declined

a damage report made by anyone else? If so, by whom?

Surveyor personally go inside each Main Boiler separately and make a thorough examination at this time?

" Donkey " " "

was not done, state for what reasons?

What parts of the Boilers could not be thus thoroughly examined?

What special means, in the absence of internal examination, were adopted by the

Surveyor to assure himself of the thorough efficiency of those parts of each Boiler?

Latest date of internal examination of each boiler

Surveyor examine the Safety Valves of the Main Boiler? To what pressure were they afterwards adjusted under steam?

Surveyor examine the Safety Valves of Donkey Boiler? To what pressure were they afterwards adjusted under steam?

Surveyor examine all the manholes, doors and their fastenings of the Main Boilers? , and of the Donkey Boilers?

Surveyor examine the drain plugs of the Main Boilers? , and of the Donkey Boiler?

Surveyor examine all the mountings of the Main Boilers? , and of the Donkey Boiler?

Screw shaft now been drawn and examined? Is it fitted with continuous liner? Is an approved appliance fitted at the after end of

shaft now been changed? If so, state reasons the shaft to permit of it being efficiently lubricated?

Is the shaft now fitted been previously used? Has it a continuous liner? Is an approved appliance fitted at the after end of

State the distance between lignum vitae or bearing metal of stern bush and top of after bearing of screw shaft

Survey is not complete, state what arrangements have been made for its completion and what remains to be done

Main Engines of the above vessel are unable to be worked as they are out of

tion owing to tank top being buckled. (See Report No. 1456 on Hull)

General Observations, Opinion, and Recommendation:—

State clearly what alteration, if any, is suggested to be made in the existing classification of the vessel's machinery in the Register Book, consequent upon this survey, and also

any alteration required to be made in the records of the vessel's machinery, boilers, working pressures, &amp;c.; thus, for example, R.S. 9, 11, B.A.M.S. 9, 11, or L.M.C. 9, 11,

140 lb., F.D., &amp;c.)

Recommended that the record of *L.M.C.* be expunged from the Register Book

the case of this vessel.
