

s/s. "Queenmoor."

Nwc. 77468.

It is submitted the Newcastle Surveyors should be requested to state whether the heating surface of the 3 boilers given in their report is correct, as this does not agree with that given on the boiler plan. viz 8460 square feet.

The nominal horse power reported appears to be calculated from the heating surface given on the plan.

They should also state if Section 34 of the Rules Par 6. (g) has been complied with.

Yes.
