

RECEIVED APR 10 1901

Received by Chief Ship Surveyor 4. 10. 01

Received from Chief Ship Surveyor

EL'S NAME Steel S. S. No 203.

Report Rot No. 3257

Remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

"The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement." - Extract from Sub-Committee's Report, 24/5/92.

Remarks of Survey 1st entry

It is submitted that before this case receives the consideration of the Committee, the Newcastle Surveyors should be informed that a first entry report on this vessel has been received from the Rotterdam Surveyors, in which it is stated that the Machinery will be placed on board at South Shields, and that the parts at the engine and boiler openings (top casings) which have been left unfinished, require to be completed. The Newcastle Surveyors should therefore be requested to attend to this matter, and report upon the same when finished, for the information of the Committee, with a view to the vessel's classification.

Pr. to Hwc. 4/10/01.
