L O N D O N . E . C . 3 .

Sir ,

Referring to Electric Light Report N° 1224 upon the steamer "UNION" N° M4 of the Chantiers et Ateliers de Penhoët at St-Nazaire, being forwarded herewith, I beg to state that the brake of the fore dynamo gave out while running, upon the trial, but has since been repaired. As the vessel is laid up for an indefinite period, and there is no steam to turn with, there remains in order to complete this installation, another trial of the fore dynamo to be made.

I am , Sir ,

Your obedient servant,

*G. Demarest*
