S.S. "NATIA", 7434 tons gross.

This vessel has recently been completed in Glasgow and classed by the Glasgow Committee.

Although launched on the 20th April, she was not completed until the 3rd December, nearly eight months later.

For a vessel of this size the Rules allow only six months for completion, but in special cases an extension of time has been approved by the Committee.

As it is stated that the delay in the completion of the vessel is largely due to labour troubles, the Glasgow Committee recommend that the date of build be recorded as December 1920.

This recommendation is submitted for the favourable consideration of the Committee.
