

## REPORT ON ELECTRIC LIGHTING INSTALLATION. No. 8492

Port of Belfast Date of First Survey 28 Oct. 1920 Date of Last Survey 4 Feb. 1921 No. of Visits 12.  
 No. in Reg. Book on the Iron or Steel P.S. City of Cambridge Port belonging to Glasgow  
 Built at Belfast By whom Workman Clark & Lay Ltd When built 1921  
 Owners City Line Ltd Owners' Address Glasgow  
 Yard No. 355 Electric Light Installation fitted by Clarke Chapman & Lay Ltd When fitted 1921

## DESCRIPTION OF DYNAMO, ENGINE, ETC.

One single cylinder double acting open type vertical engine direct coupled to a continuous current compound wound dynamo ✓  
 Capacity of Dynamo 250 ✓ Amperes at 150 ✓ Volts, whether continuous or alternating current continuous ✓  
 Where is Dynamo fixed In Engine Room ✓ Whether single or double wire system is used Double ✓  
 Position of Main Switch Board Near Dynamos ✓ having switches to groups A.B.C.D.E.F.G.H of lights, &c., as below  
 Positions of auxiliary switch boards and numbers of switches on each Each light & group of lights provided with switches as required ✓

If fuses are fitted on main switch board to the cables of main circuit Yes ✓ and on each auxiliary switch board to the cables of auxiliary circuits Yes ✓ and at each position where a cable is branched or reduced in size Yes ✓ and to each lamp circuit Yes ✓  
 If vessel is wired on the double wire system are fuses fitted to both flow and return wires or cables of all circuits including lamp circuits Yes ✓  
 Are the fuses of non-oxidizable metal Yes ✓ and constructed to fuse at an excess of 50 per cent over the normal current  
 Are all fuses fitted in easily accessible positions Yes ✓ Are the fuses of standard dimensions Yes ✓ If wire fuses are used are permanent instructions fitted on or near each switch board giving particulars of proper size of fuse for each circuit Yes ✓  
 Are all switches and fuses constructed of incombustible materials and fitted on incombustible bases Yes state & proclaim ✓

Total number of lights provided for 130 arranged in the following groups :—

A Saloon	19	lights each of	16	candle power requiring a total current of	10.6	Amperes
B Engineers P.D.S.	26		16	candle power requiring a total current of	15.1	
B Navigation	20	lights each of	16	candle power requiring a total current of	11.2	Amperes
C 1/2 Watt Lamps	8	lights each of 6-200 chl-32 chl-16		candle power requiring a total current of	17.1	Amperes
D 1/2 Watt Lamps	2	lights each of	2-2000	candle power requiring a total current of	3.3	Amperes
E Cabin Quarters		lights each of	16	candle power requiring a total current of	19	
F Wireless				candle power requiring a total current of	25	Amperes
G Mast head light with	1	lamps each of	32	candle power requiring a total current of	2.2	Amperes
H Side light with	1	lamps each of	32	candle power requiring a total current of	2.2	Amperes
I Cargo lights of	6		250	candle power, whether incandescent or arc lights	Incandescent	

If arc lights, what protection is provided against fire, sparks, &c.

Where are the switches controlling the masthead and side lights placed In Chart Room ✓

## DESCRIPTION OF CABLES.

Main cable carrying	250	Amperes, comprised of	37	wires, each	13	S.W.G. diameter, .250 ✓ square inches total sectional area
Branch cables carrying	10.6	Amperes, comprised of	7	wires, each	20	S.W.G. diameter, .0070 ✓ square inches total sectional area
Branch cables carrying	19	Amperes, comprised of	7	wires, each	18	S.W.G. diameter, .0125 ✓ square inches total sectional area
Leads to lamps carrying	1.1	Amperes, comprised of	1	wires, each	18	S.W.G. diameter, .0018 ✓ square inches total sectional area
Cargo light cables carrying	3	Amperes, comprised of	168	wires, each	39	S.W.G. diameter, .0050 ✓ square inches total sectional area

## DESCRIPTION OF INSULATION, PROTECTION, ETC.

Sulcinated India rubber cabled & braided & lead covered also armored  
 Braided overall ✓

Joints in cables, how made, insulated, and protected No joints except mechanical ones ✓

Are all the joints of cables thoroughly soldered, and the flux used not containing acids or other corrosive substances Yes ✓ Are all joints in accessible positions, none being made in bunkers, cargo spaces, or spaces which may at any time be used for carrying cargo, stores, or baggage Yes ✓

Are there any joints in or branches from the cable leading from dynamo to main switch board No. ✓

How are the cables led through the ship, and how protected Lead covered armored & braided cables run through tween deck & bridge spaces & slipped to underside of deck. ✓

Lloyd's Register  
Foundation

W603-0155

**DESCRIPTION OF INSULATION, PROTECTION, ETC.—continued.**

Are they in places always accessible No

What special protection has been provided for the cables in open alleyways or where exposed to weather or moisture Lead covered

Armored & braided cables

What special protection has been provided for the cables near galleys or oil lamps or other sources of heat Lead & armored cables

What special protection has been provided for the cables near boiler casings

What special protection has been provided for the cables in engine room

How are cables carried through beams In lead buster ✓ through bulkheads, &c. in WT glands ✓

How are cables carried through decks In galvanized iron deck tubes ✓

Are any cables run through coal bunkers Yes ✓ or cargo spaces Yes ✓ or spaces which may be used for carrying cargo, stores, or baggage Yes ✓

If so, how are they protected Lead covered armored & braided cables ✓

Are any lamps fitted in coal bunkers or spaces which may at times be used for cargo, coals, or baggage No ✓

If so, how are the lamp fittings and cable terminals specially protected

Where are the main switches and fuses for these lights fitted

If in the spaces, how are they specially protected

Are any switches or fuses fitted in bunkers No

Cargo light cables, whether portable or permanently fixed Portable ✓ How fixed To WT Connection Boxes ✓

In vessels fitted on the single wire system, how is the dynamo terminal fixed to the hull of vessel Double wire system ✓

How are the returns from the lamps connected to the hull

Are all the joints with the hull in accessible positions

Is the installation supplied with a voltmeter Yes ✓, and with an ammeter Yes ✓ , fixed in distribution board

**VESSELS BUILT FOR CARRYING PETROLEUM.**

In vessels built for carrying petroleum, are all switches and fuses fitted in positions not liable to the accumulation of petroleum vapour or gas

Are any switches, fuses, or joints of cables fitted in the pump room or companion

How are the lamps specially protected in places liable to the accumulation of vapour or gas

The copper used is guaranteed to have a conductivity of not less than that of the Engineering Standards Committee's standard, and the wires are protected by tinning from the sulphur compounds present in the insulating material.

Insulation of cables is guaranteed to have a resistance of not less than 650 megohms per statute mile at 60° Fahrenheit after 24 hours' immersion in water, the test being made after one minute's electrification at not less than 500 volts and while the cable is still immersed.

The foregoing statements are a correct description of the Electric Light installation fitted by us on this vessel and we declare that it is at this date in good order and safe working condition.

For Clarke, Chapman & Co. Ltd.

Electrical Engineers

Date Feb. 24<sup>th</sup> 1921

**COMPASSES.**

Distance between dynamo or electric motors and standard compass 46 ft

Distance between dynamo or electric motors and steering compass 140 "

The nearest cables to the compasses are as follows:—

A cable carrying 1.1 Amperes 12 feet from standard compass

A cable carrying 1.1 Amperes 6 feet from standard compass

A cable carrying - Amperes - feet from standard compass

6 feet from steering compass

12 feet from steering compass

- feet from steering compass

Have the compasses been adjusted with and without the electric installation at work at full power Yes

The maximum deviation due to electric currents, etc., was found to be nil degrees on -all course in the case of the standard compass and nil degrees on -all course in the case of the steering compass.

pro WORKMAN, CLARK & COMPANY LTD.,

w. H. Shumble Asst. Secretary Builder's Signature.

Date 28th February, 1921.

**GENERAL REMARKS.**

This installation is of good description, and has been fitted in accordance with the Rules

It is submitted that  
this vessel is eligible for  
**THE RECORD.**

Electric light
