Lloyd's Register of Shipping,

71. Fenchurch Street, E.C. 3.

13th December, 1928.

Dear Sirs,

I duly received Mr. Scullard's letter of the 11th instant enclosing for verification plans of stiffening of the tank top in way of the Bauer-Wach turbines, and new intercostals under the main engines for the T.S.S. "NADANA", and with regard thereto I have to inform you that the first mentioned plan has been verified and found to be a copy of the one approved on the 29th ultimo. *(hardened)*

With regard to the new intercostal girders under the main engines, I have to point out that this arrangement is similar to that recently fitted in the T.S. "NUDDA".

The plans in question are being returned to your address today under separate cover.

I am, Dear Sirs,

Yours faithfully,

The Surveyors,

FALMOUTH.

Secretary.
