Dear Sir,

Having reference to your classing-letter of the 29. ult, respecting the steamer "MORA", I beg to inform you that the deep tank abaft the collision bulkhead is used as a ballast tank. Its length is 26 feet and its capacity 157 tons, which are both encluded in the length and capacity of the double buttom forward, stated in my report. I also beg to inform you that this tank has been filled and tested as required by the rules, and that the second deck beams at the fore end of No. 1 hold are fitted to every frame, <sup>as</sup> indicated on the approved plan.

Please excuse this slip, made by me.

I am, Dear Sir,

Yours faithfully,

*G. H. G. G. G.*

The Secretary,

L O N D O N .
