Dear Sirs,

No. 1122 : M.S. "Arnus".

We have to acknowledge receipt of your letter of the 15th. inst. intimating your approval of the pumping arrangement in the machinery space proposed for the above vessel, and we note the remarks contained in your letter. With reference to the oil fuel shut off valves operated from deck, we would point out that in this case valve No. 960 is a Turnbull special self-closing valve and is operated from deck by means of a wire rope pull and lever, in which ^{case} it would not appear to be necessary to operate valves in chest No. 970 from deck.

Ref. Valves 970-971. In addition to the above have been replaced by brass non return valves

L. G. S.

Yours faithfully,
