

4-Masted Schooner "M. P. CONNOLLY" built by the QUEBEC  
SHIPBUILDING & REPAIRING CO. LTD. for Messrs. CARTER, WOOD  
SHIPPING CO. LTD.

-----

The First Entry Report for the above vessel has  
been received and it is observed that the dimensions have  
been modified from that shown on the approved plans. The  
length between perpendiculars is now 207 feet instead of  
200 feet, the breadth 41' 3" instead of 41' 8". The tonnage  
for scantlings, as given on the first entry report, is  
consequently higher than was contemplated, and changes the grade.

The scantlings and arrangements as indicated on the  
First Entry Report have been compared with the Rule requirements  
and it is found that these are such as could be recommended to  
the Committee for the Class A1.
