

150719

Wood Barquentine "HYASTON".

It is submitted Messrs. Price, Forbes & Co. might be informed that plans of this vessel were submitted to this Office by the Surveyor and were approved for the contemplated class 16A1. She was built under the special survey of the Society's Surveyor at Rangoon, and a preliminary interim certificate was issued by him on the 14th October 1919, of which a copy could be furnished if so desired.

The Surveyor duly forwarded his report on the ship, but certain items were not quite clear or information was omitted, and he was communicated with on the subject on the 27th November last, no reply having yet been received. Until these points are settled the usual First Entry Certificate of Classification could not be issued.
