LIAM HANSEN.

BERGEN. January 11th 1917.

This steamer was some time ago surveyed by Lloyd's in the Tyne, and some repairs were effected at the same time. However some of the class is still behind, and the Captain writes that the vessel, according to declaration of Lloyd's Surveyor, will get postponement with the classification until June. I have, however, not heard anything direct from Lloyd's about this and take hereby the liberty of requesting you to procure for me this postponement which I think is quite right.
