FREEBOARD recommended amidships from centre of Disc to top of Statutory Deck Line, Wood (Iron) Deck :-

Fresh Water Line	above centre of Disc
Indian Summer Line	" " "
Winter Line	below "
Winter North Atlantic Line	" " "

If the frames, skin planking, or ceiling are of unusual thickness the breadth of vessel to inside of ceiling should be reported if possible.
In vessels obtaining an allowance for deck erections under Para. 11 where the sheer drops abait amidships the height of the R.Q.D. is to be taken from the level of the top of the amidship beam.
In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-post. In vessels having poops and forecastles, it means the sheer measured at the distance one eighth of the vessel's length from stem and stern-post.

5.17. T.

Marking Form
rec'd 17/8/32

MARKING FORM

RECEIVED 24 JAN 1925

MARKING REPORT

REGISTERED 3-7-22

State dimensions of freeing port area on back of this form.

The Surveyor should state whether the fall in sheer as reported is measured relatively to the straight line of keel or to the water line. If measured relatively to water line the vessel's draft at time of survey, and also the usual load draft forward and aft should be reported.

MARKING REPORT

RECEIVED 16/18

W982-0301

Do all the Frames extend to the top height in the Poop?	Raised Quarter Deck ?		Bridge House ?	Forecastle ?
To what height do the Reverse Frames extend?	<i>Longitudinal framing.</i>			
Has the Poop or Raised Quarter Deck an efficient Iron Bulkhead at the fore end?	<i>Yes.</i>			
Give particulars of the means for closing the openings in Bulkhead	<i>Strong hinged steel doors.</i>			
Is the Poop or Raised Quarter Deck connected with the Bridge House?	<i>No.</i>		Has the Bridge House an efficient Bulkhead at the fore end?	<i>Yes.</i>
Give particulars of the means for closing the openings in Bulkhead	<i>Strong hinged steel doors.</i>			
What is the thickness of the Bridge Front plating?	<i>.40</i>		and Coaming plate?	<i>.44</i>
Give scantlings and spacing of the Stiffeners	<i>8 x 32 x .60 B.A. spaced 30" apart.</i>			
Are bracket plates fitted at each end of the Stiffeners?	<i>Yes.</i>		Are hor'l. brackets fitted connecting Bridge Bulk'd. with Bulwarks?	<i>Yes.</i>
Has the Bridge House an efficient Steel Bulkhead at the after end?	<i>Yes.</i>			
How are the openings closed?	<i>Shifting boards full height fitted in channels pivoted to bulkhead.</i>			
Is the Forecastle at least as high as the main or top-gallant rail?	<i>Yes.</i>		Has the Forecastle an efficient Iron Wood Bulk'd. at after end?	<i>Yes.</i>
Are the Engine and Boiler openings covered by a Bridge, Poop, Raised Quarter Deck, or enclosed by a Strong Iron or Steel Deckhouse?	<i>Covered by a Bridge House</i>			
If the openings are not so protected are the exposed parts of the Casings efficiently constructed?				
Give thickness of plating; scantlings and spacing of Stiffeners.				
What is the height of the exposed Casings?			Are suitable means provided for closing all openings in them in bad weather?	
Are the Weather Deck Hatchways efficiently constructed and at least equal to the requirements of Section 28 of the Rules for 1904-5? Give particulars below:	<i>Yes.</i>			
Position and Size.	<i>N°1 34' x 16'</i>	<i>N°2 34' 36' x 16'</i>	<i>N°3 10' x 16'</i>	<i>N°5 30' x 16'</i>
