

COPY.

2

12th September, 1938.

"JOSEPH SWAN"

when the Official
Number has been inserted, particulars of which should be
forwarded to this Office. With reference to your letter of the
9th instant, it is assumed that the height of the ventilator
coaming on the sloping upper deck hatchway end coaming is 4'6"
as in the sister ships, and not 6" as stated in the Rpt.C11,
but I shall be glad if you will confirm this.

The Surveyors,
SUNDERLAND.
